

2026 Molecular Diagnostics Training School

23.-25. February 2026, Medical University of Vienna, Austria

- WHY?**
- ✓ Unconfident when reading or writing molecular diagnostic reports?
 - ✓ Striving to enhance your diagnostic skills?
 - ✓ Seeking confidence in applying your knowledge in a clinical setting?
 - ✓ Might your clinical environment benefit from someone with advanced training in molecular diagnostics (you?)
- GAIN?** Engaging, in-depth lectures focusing on oncological pathology, including:
- ✓ Core concepts in Clinical Molecular Diagnostics
 - ✓ Organ- and disease-specific diagnostics
 - ✓ Future outlook
- ON TOP**
- ✓ Access to online pre-conference tutorials
 - ✓ Chance to discuss real-world challenges/solutions with peers & experts
 - ✓ A great reason to visit Vienna
- WHO?** Researchers, clinicians, pathologists, lab technicians, PhD students, anyone working with diagnostic tools or data.

Our **updated** programme includes extensive practical case discussions and hands-on exercises to sharpen your diagnostic abilities!

The **Molecular Diagnostics** and **Computational Pathology** Training Schools will take place back-to-back as hybrid events. While online participation is possible, we **strongly recommend** on-site attendance for the best experience.
